Superiority

in ballistic body armor

**worlwide unique
Level III, IV+ and
wolfram-carbid
protection**

Overview Level III / III+ / III++ versus VPAM

USA NIJ 0101.04	
III	7.62x51 M80 NATO Ball, 9.6g 838 m/s ±10 m/s
III+	7.62x39 MSC, 7.9g 730 m/s ±10 m/s
III++	5.56x45 SS109, 4.0g 930 m/s ±10 m/s

USA NIJ 0101.06	
III	7.62x51 M80 NATO Ball, 9.6g 847 m/s ±10 m/s
III+	7.62x39 MSC, 7.9g 730 m/s ±10 m/s

Germany VPAM BSW/APR 2006	
6	7.62x39 M43 FMJ/PB/Fe-Core, 8.0g; PS 720 m/s ±10 m/s
7	.223 Rem. FMJ/PB/SCP; 4.0g MEN, SS109 950 m/s ±10 m/s
7	.308 Win. FMJ/PB/SC, 9.55g MEN, DM111 830 m/s ±10 m/s
8	7.62x39 FMJ/PB/HCI 7.7g; Core 4.1g 65HRC; BZ 740 m/s ±10 m/s

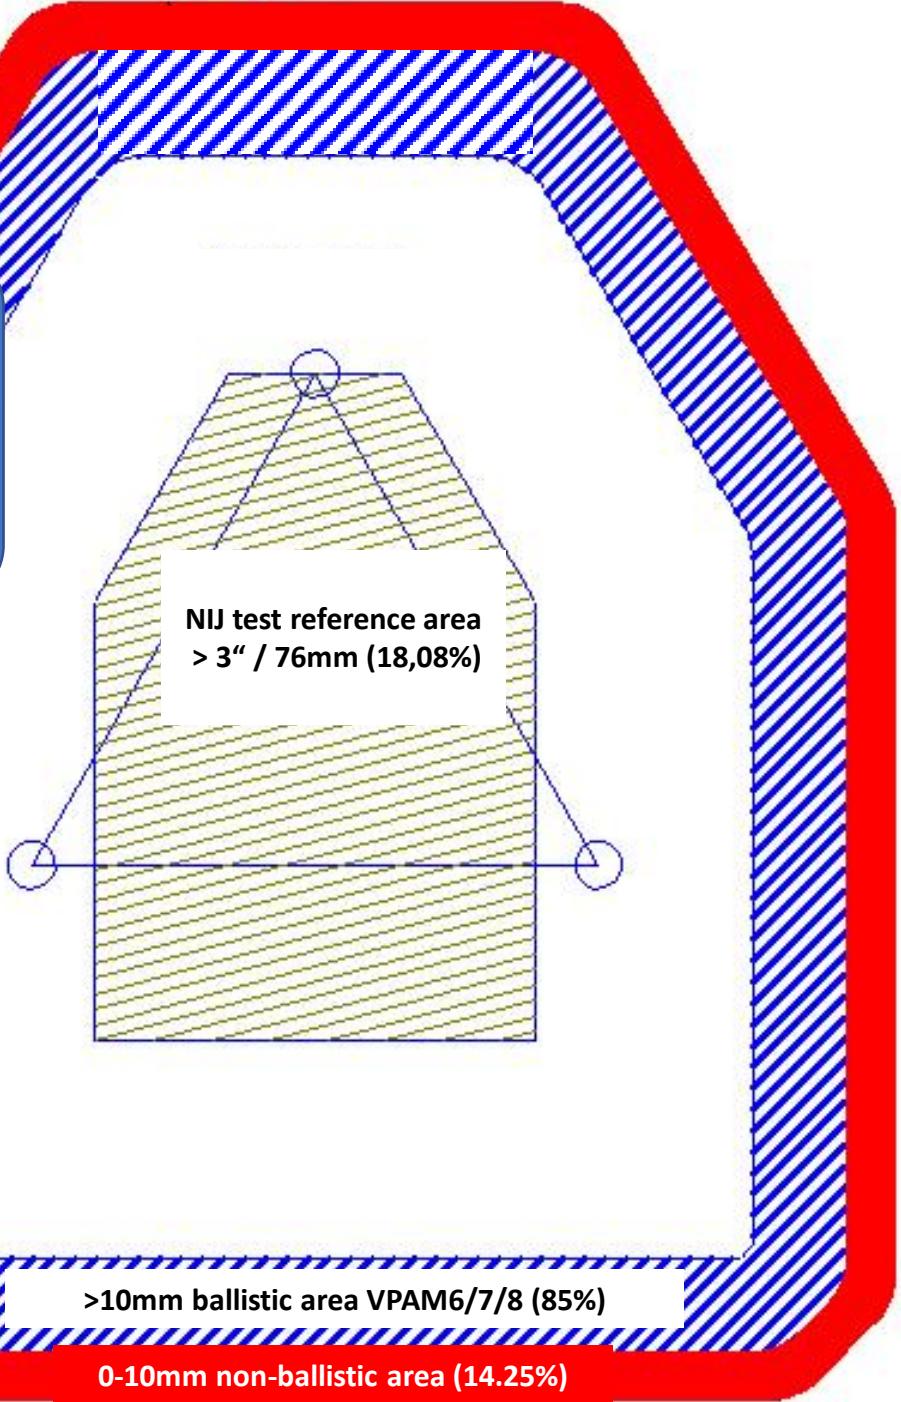

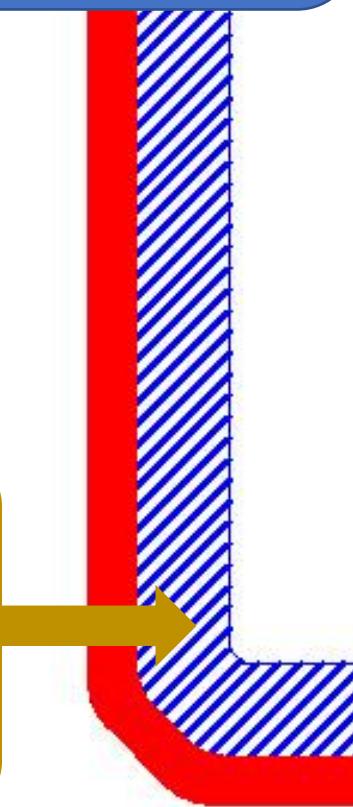

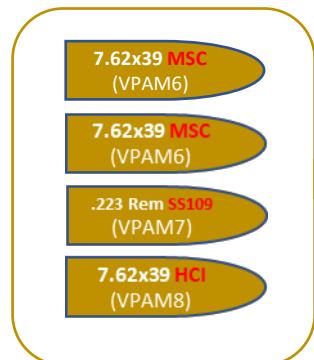

For typical Level III to III++ demands, W.A.R. always includes 7.62x39HCl (=VPAM8) protection to ensure a more realistic and optimized protection and offers certified increased ballistic surface at 10mm behind the rim.

Level III++ & VPAM 8

W.A.R. Level III++ incl. VPAM 8 means

- NIJ protects only 18% of the plate surface
- 85% protection against VPAM 6/7/8

Overview Level IV versus IV+ and VPAM10

USA
NIJ 0101.04

USA
NIJ 0101.06

Germany
VPAM BSW/APR 2006

IV
7.62x63 M2AP
10.8g
869 m/s ±10 m/s

IV
7.62x63 M2AP
10.8g
878 m/s ±10 m/s

10
7.62x54R
FMJ/PB/HCI
10.4g; Core 5.3
63HRC; B32
860 m/s ±10 m/s

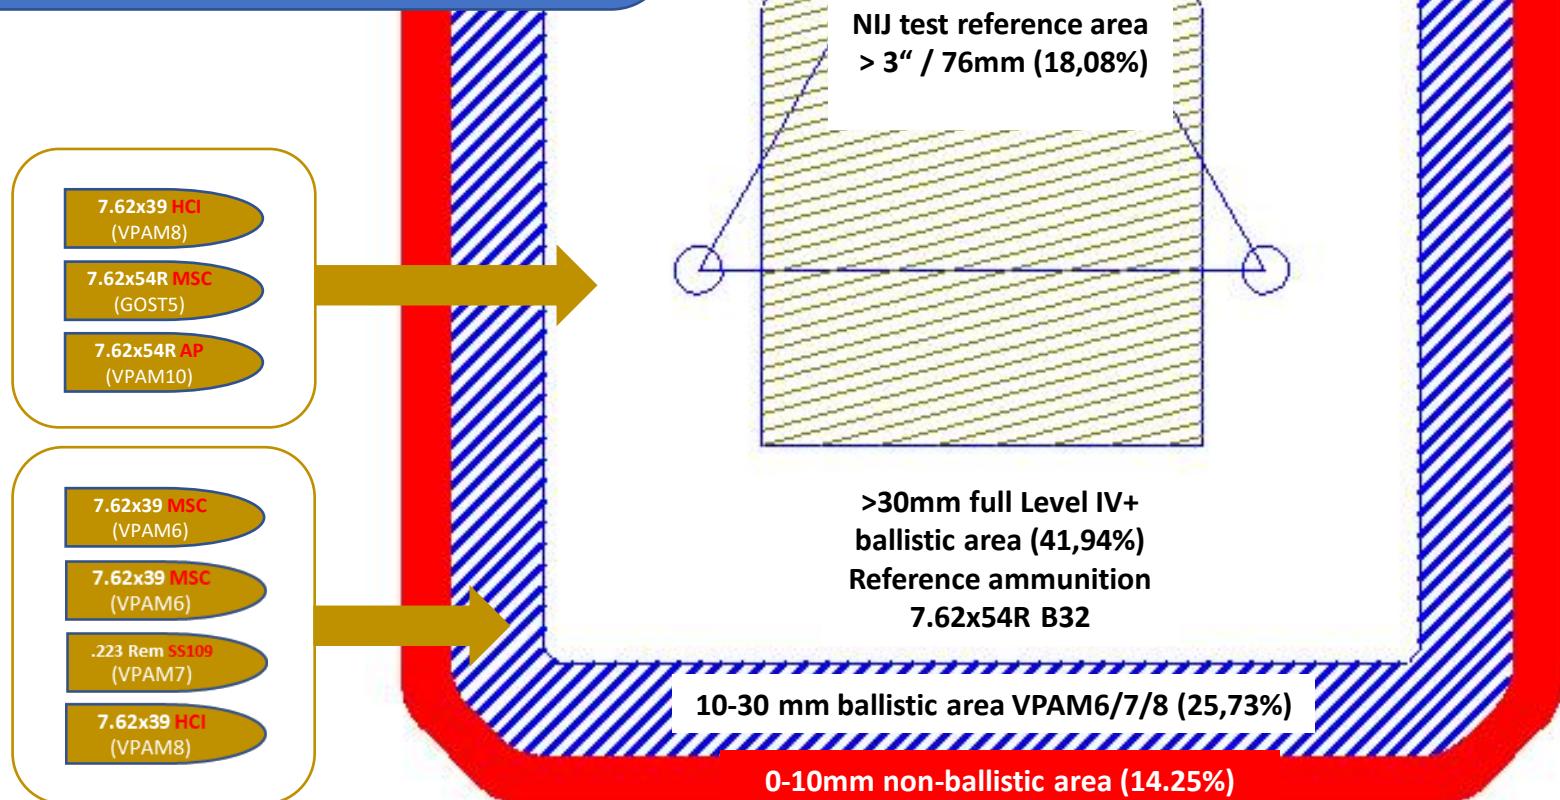

For typical Level IV demands, W.A.R. always includes 7.62x54R B32 (=VPAM10) protection to ensure a more realistic and optimized protection and offers certified increased ballistic surface at 30mm behind the rim.

Level IV+ protection

W.A.R. Level IV+ means...

- NIJ protects only 18% of the plate surface
- 85% protection against VPAM 6/7/8
- 56% protection against VPAM 10 (7.62x54AP)

Unique ballistic protection surface BEYOND NIJ

Reference WAR Plate Type Level IV+

>30mm Level IV+
reference ammunition 7.62x54R B32
860m/s, Trauma < 40mm

Plate M Level IV+ VPAM8 & 10 SA

Special Composite Ballistic Panels Certified for Stand Alone Solution

- LEVEL IV according NIJ 0101.04
30-06 Springfield, bullet type

m/s

Standard Dimension and Weight

- Side plate, single curved, 145-150x195-200 mm, 1.020g
- Front/Rear plate late, single curved, 245-250x290-295 mm, 2.420 g
- Front/Rear plate, multi curved 250-255x295-300 mm, 2.460 g
- Non standard dimensions are manufactured at the customer's request

wolfram-carbid protection

- **Wolfram-Carbide ammunition protection!!!**
(.308 AP492 WC, .223Rem WC) *
- available in single and multi-shot
- plate weight from 3.1 – 3.3 kgs as per customer request and specification
